# ROSELLE POLICE

## C.A.R.E.S.

In an effort to reduce crime, identify criminals, and increase safety the Roselle Police Department is launching a video sharing partnership with the community called **ROSELLE POLICE C.A.R.E.S.**

This partnership works on a voluntary basis with business and property owners who have video camera systems that record public areas and are willing to register their locations with the police department. We will locate the camera systems on a map and provide it only to Roselle police officers who respond to criminal incidents. This gives them the ability to see the locations where private security cameras are recording public areas and they will be able to quickly contact the registered video partner to see if there is footage available to assist with an investigation.

### How does the Program Work?

- Business and property owners who have a private security camera system that records a public area would register their location with the police department.
- Registration data will be tracked on a map.
- If a crime or suspicious incident occurs in the vicinity of the registered camera system a member of the Roselle Police Department would contact the registrant and ask them to review or provide recorded footage relating to the specific incident.
- Police personnel will only ask to share footage relating to a specific criminal act for use as evidence to aid in ongoing investigations.

### How to Register your Security Camera System?

- Go to [www.roselle.il.us](http://www.roselle.il.us) and complete the **ROSELLE POLICE C.A.R.E.S.** registration form electronically.
- If you are unable to submit your information electronically, you can pick up a registration form in the police department lobby, complete it, and drop it off with the Records staff or mail it to:

**Roselle Police Department**  
**103 S. Prospect Street**  
**Roselle, IL 60172**

**Attn: Community Resource Coordinator Madden**

**or**

**Email completed form to: [crc@roselle.il.us](mailto:crc@roselle.il.us)**

- Once you submit your information, a member of the Roselle Police Department will follow up to confirm your registration.
- There is no fee, and you can unsubscribe at any time.

### What about Privacy and Security Concerns?

- This partnership is not intended for active or live feed surveillance.
- Registration information will be stored in a secure computer.
- Roselle police will not remote or direct access a private video system. It will require cooperation from the camera system's owner to provide a copy of the requested video footage.
